

My job & life are very stressful.

When I drive to work, I need to get caught up on the news.

But when I drive home, I need to DE-stress, and the BEST way to do that is to listen to K-LOVE music station.

I honestly think that if more people listened to the wonderful, soothing and uplifting music on K-LOVE, there would be less road-rage and happier work & family environments.

Their station does not preach, but provides positive encouragement.

There is no other station like this one, and it would be a terrible loss if it were displaced by an LPFM station.

(Also, we have even heard of negative physical effects on the human body from the low power FM transmissions!)

Please keep K-LOVE and similar stations on the air!!! Thank you!
